# How can I prevent food waste and be a food boss?

What packaging materials and storage did you investigate?

Item	What food is it suitable for?	Why is it suitable?	Where would you store it?	What food is it not suitable for?	Why is it not suitable?	Other thoughts
Eg: Plastic wrap	Sandwich	Seals and protects it from air	Lunchbox or fridge	Mushrooms, bananas	Plastic makes this food sweat and moisture builds up	Single use plastic is not good for our environment
